Specification

Henan Pingzhou Optoelectronic Technology Co., Ltd., founded in 2018, is headquartered in Zhengzhou, Henan Province. The company runs production spaces covering 15,000 square meters. It has around 300 professional staff members and adopts advanced production devices. We focus on research, development, design and production of LED display products. Our LED display products feature stable brightness, accurate color presentation, low energy consumption and steady operation. The products are used in many fields including advertisement, stadiums, control rooms, retail stores and stage performances. Our LED display solutions are delivered to markets in North America, Europe and Southeast Asia. We maintain stable cooperation with clients from different regions. We follow standardized production procedures to guarantee consistent product performance. We keep upgrading technologies to fit diverse application needs worldwide. We build long-term partnerships with global clients based on stable supply and thoughtful service.
